

Why MARRS ?

MARRS is a global leader in document management, integration services and support. MARRS helps organizations manage documents in the workplace effectively and helps derive value from their disparate physical or digital information assets, automating its use across the enterprise.

MARRS was founded in 2006 as a professional services company that has acquired a range of expertise through aggressive hiring of new talent and under various private acquisition agreements, primarily in Healthcare, Consulting, Information Technology, and Staffing. MARRS Professional Services has a strategic relationship with Vignette/ Open Text as a Value Added Reseller and a professional services implementation partner as well.

Manipal Reddy, Praveen Kalvala and Shay Reddy are the principals of the company and are committed to its success !

Imaging and Transactional Content Management for Energy Services

Many large Utility entities have invested in Legacy systems such as FileNet or other Data storage, licensing and support intensive solutions. With technology changing and getting more affordable and simpler to use, MARRS has helped many Large Utility companies move from a legacy system to a more modern system with a complete data port over of Terabytes of Data to a new imaging solution in a no-downtime environment. Some of the Nation's largest Energy services companies use this solution and the MARRS Subscription model. Our Consultants have a wide-range of experience working on mission-critical projects at some of the world's best companies. Here is a comprehensive

Migration - In with the new - Out with the old .

Migrate from FileNet , Documentum, Hyland, Onbase

MARRS Professional Services has migrated various large customers from old systems to a new and improved system. In most cases the overall cost of change was minimal as there was substantial cost savings in licensing, hardware and support required when migrating to Open Text's New imaging and workflow solutions customers saved, time, money and above all increased throughput in their processes.

Datacapture and Processing Services

MARRS Professional Services provides Datacapture, scanning and indexing services. Through VPN or from our offsite service center, whether onsite or off MARRS can help scan and index documents as well as integrate your documents into your enterprise environment.
