

Why MARRS ?

MARRS is a global leader in document management, integration services and support. MARRS helps organizations manage documents in the workplace effectively and helps derive value from their disparate physical or digital information assets, automating its use across the enterprise.

MARRS was founded in 2006 as a professional services company that has acquired a range of expertise through aggressive hiring of new talent and under various private acquisition agreements, primarily in Healthcare, Consulting, Information Technology, and Staffing. MARRS Professional Services has a strategic relationship with Vignette/ Open Text as a Value Added Reseller and a professional services implementation partner for as well. Manipal Reddy, Praveen Kalvala and Shay Reddy are the principals of the company and are committed to its success !

Case Management for Insurance

MARRS Professional Services

MARRS Professional Services has implemented Case management solutions for some of the world's largest insurance providers. The case management services involve an integrated large scale, and core process improvement of the entire lifecycle of the insurance claims process. Some of the Nation's premier insurance agencies, with personal, life and business policies use MARRS to implement their case management software and solutions. Many customers have used a MARRS Subscription model and have cut down their costs to maintain and keep systems under high availability.

Enterprise Imaging Services for Insurance

MARRS Professional Services

Using flow manager for a case management process to manage an account payable workflow is an example of what we do for insurance companies. Core workflow generation and integration with other core components of the enterprise which streamlines process, systems and workflow is what we do.

Datacapture and Processing Services

MARRS Professional Services provides Datacapture, scanning and indexing services. Through VPN or from our offsite service center, whether onsite or off MARRS can help scan and index documents as well as integrate your documents into your enterprise environment. We provide Batch scanning services
